

ADHD and the Spoon Theory

by NEWLIFEOUTLOOK TEAM

Understanding the Spoon Theory

When dealing with attention deficit hyperactivity disorder (ADHD), explaining yourself is a constant reality. Explaining your behavior, experiences, and related pain seems to be a necessary evil to make people understand chronic illness.

People with chronic illness across the globe are now using Christine Miserandino's spoon theory to help others better understand what they're going through.

As the story goes, Christine was trying to make her friend understand her experiences with lupus. She used spoons as a representation of energy, saying each activity she does in a day "costs" a certain amount of spoons.

A typical "healthy" person has a high or unlimited amount of spoons, but those with chronic illness must pace themselves and plan their day according to the amount of spoons they hold.

Read on to learn more about the spoon theory and how to join the conversation.

what is Spoon Theory?

The **Spoon Theory** was created as a way for people with chronic illness to explain their experience to others.

= ENERGY

★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★

IN THE U.S. ALONE
there are at least
112 MILLION
people living with one or more
CHRONIC ILLNESSES¹

★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★

Despite this, there is still a lack of understanding towards sufferers.

HOW IT WORKS

When you have a chronic illness, you have a **limited number of spoons** for each day — and each task you complete costs a certain number of spoons.

Once your spoons are gone, they're gone.

Say you have **10 tasks** to accomplish in a day — like showering, getting dressed, going to work, etc. — and only **10 spoons** for that day.

Some tasks may require more than one spoon, so some things won't get done. You could dip into your spoons for the next day, but then you'll have even fewer spoons tomorrow.

The difference in being sick and being healthy is having to make choices... the rest of the world doesn't have to.²

— Christine Miserandino, spoon theory creator

AM I A SPOONIE?

The theory has a following of people with a range of conditions who call themselves **Spoonies**.

Conditions the Spoon Theory Applies to Include:

- | | |
|----------------------------|-------------------------|
| ★ Lupus | ★ Arthritis |
| ★ Fibromyalgia | ★ Diabetes |
| ★ Depression | ★ Cancer |
| ★ Anxiety | ★ Chronic pain syndrome |
| ★ Chronic fatigue syndrome | ★ Osteoporosis |
| ★ Multiple sclerosis | ★ COPD |

Show the Spoonies in Your Life You Care.

Share to get the word out about chronic illness and end stigma against sufferers.
